

Product no **YH80008**

Anti-HA tag Rabbit Polyclonal Antibody

Product information

Target description	Human influenza hemagglutinin (HA) is a surface glycoprotein required for the infectivity of the human virus. The HA tag is derived from the HA molecule corresponding to amino acids 98-106 has been extensively used as a general epitope tag in expression vectors. Many recombinant proteins have been engineered to express the HA tag, which does not appear to interfere with the bioactivity or the biodistribution of the recombinant protein. This tag facilitates the detection, isolation, and purification of the proteins.
Antigen	This polyclonal antibody was raised by immunizing rabbit with the peptide of epitope "YPYDVPDYAC" conjugated to carrier protein.
Application tested	Western Blot analysis (WB): 1,000 ~ 9,000 dilution ELISA: 2,000 ~ 20,000 dilution IP: 500 ~ 1,000 dilution
Form	Protein A affinity purified antibodies (containing 50% glycerol)
Storage	Aliquot and store at -20°C for long term storage. The product is stable for one year from the date of shipment.
Package	100ug/per tube Con. 1mg/mL

Loading: HA tagged fusion protein (30kDa,55kDa)
3,000x dilution
