

Product no **YH-80003**
Anti-6xHis Tag Mouse Monoclonal Antibody

Product information

Background	The 6x histidine recombinant protein tag is made up of 6 histidine residues attached to either the amino or carboxy terminus of the protein being expressed. The recombinant protein can then be purified using immobilized metal ions, traditionally nickel, in a procedure termed immobilized-metal affinity chromatography. Further analysis of the protein can be achieved using an antibody specific to the 6x histidine in techniques such as western blotting and immunoprecipitation.
Origin	Mouse monoclonal antibody raised against a 6x histidine peptide conjugated to OVA.
Application	Western Blotting: 1:1,000 - 1:10,000
Form	Liquid (containing 50% glycerol)
Storage	Store this product at -20°C. The product is stable for one year from the date of shipment.
Package	100ug/per tube Con. 1mg/mL

Lane1-4 Cell expressed His Tag fusion protein
Lane 5 bacteria expressed His Tag fusion protein
Mouse anti His Tag monoclonal 1000X
