

Product no **YH-80002**

Anti-GST Tag Rabbit Polyclonal Antibody

Product information

Background	Glutathione S transferases (GSTs) are a family of enzymes. GST play an important role in detoxification by catalyzing the conjugation of many hydrophobic and electrophilic compounds with reduced glutathione. The amino acid sequence GST is highly conserved in most organisms, including mammals.
Origin	Rabbit polyclonal antibody raised against Glutathione-S-Transferase (GST).
Application	Western Blotting: 1:1,000 - 1:10,000 ELISA: 1:10,000 IP: 1:500 – 1:1,000
Form	Liquid (containing 50% glycerol)
Storage	Store this product at -20°C. The product is stable for one year from the date of shipment.
Package	100ug/per tube Con. 1mg/mL

MW
kDa

Loading : Bacteria expressed GST fusion protein

Antibody dilution : 1,000 x
