

THE SPECIALIST FOR IMMUNOLOGY
HIGH QUALITY RESEARCH REAGENTS

Labeled & Unlabeled

- Human CD Monoclonal Antibodies
- Recombinant Fusion Proteins

Ancell Corporation manufactures and supplies for many years monoclonal antibodies, recombinant fusion proteins, isotype controls and second step reagents for immunology research. The high performance characteristics and quality make Ancell's antibodies and proteins widely recognized reagents, which are used and cited in many scientific publications.

Ancell's extensive panel of human CD antibodies is produced by its experienced in-house development team. The products are purified and conjugated under optimized conditions and rigorously tested in cell lines and human samples. Most of the antibodies are variously labeled to perform in multiple applications, including flow cytometry, immunohistochemistry and immunofluorescence. Several antibodies have functional applications (which may be used for **activation, neutralization or blocking** studies). Ancell also offers a broad range of labeled and unlabeled biologically active recombinant fusion proteins (FC) that are complementary to their CD marker antibody panel.

Functional Antibody Highlight

anti-TCR Cβ1 (human), mAb (Jovi-1)

ANC-101-020		100 µg
ANC-101-820	Preservative free	100 µg
ANC-101-030	Biotin	100 µg
ANC-101-040	FITC	120 tests
ANC-101-050	R-PE	120 tests
ANC-101-060	APC	120 tests

CLONE: Jovi-1. **ISOTYPE:** Mouse IgG2a. **SPECIES:** Human. **APPLICATION:** FACS, IHC, FUNC.

Functional Application: This antibody clone is mitogenic for human T cells expressing the TCR Cβ1 chain.

FIGURE: FACS staining of 5x10⁵ cultured Jurkat cells using anti-TCR Cβ1/PF at 5 µg/ml. Cells stained positive with a mean shift of 1.03 log₁₀ fluorescent units when compared to a Mouse IgG2a negative control at a similar concentration.

High Performance CD Monoclonal Antibodies

ANC-549	CD279 [PD-1] (human)-mulg Fusion Protein	x	x	x				CHO cells
ANC-557	CD304 [Neuropilin-1] (human)-mulg Fusion Protein	x	x					HEK 293 cells
ANC-528	DR3 (human)-mulg Fusion Protein	x	x	x				CHO cells
ANC-536	LT β R (human)-mulg Fusion Protein	x	x	x				CHO cells
ANC-556	TIGIT (human)-mulg Fusion Protein	x	x	x				CHO cells

Negative Control Protein

ANC-581	Mulg Control Protein	x	x	x				CHO cells
---------	----------------------	---	---	---	--	--	--	-----------

Secondary Detection Proteins

ANC-253	Streptavidin (R-PE)					x		E. coli
ANC-254	Streptavidin (FITC)				x			E. coli

(*) The Ansell Product # is build by the prefix (ANC-), main PID (3 digits) and a suffix (3 digits). The last 3 digits define the labels:
 -020 = Preservatives | -820 = Preservative Free | -030 = Biotin | -040 = FITC | -050 = R-PE | -060 = APC

Functional Antibody Highlights

Antibodies are highly specific, naturally evolved molecules that recognize and eliminate pathogenic and disease antigens. The typical antibody consists of two antigen-binding fragments (Fabs), which are linked via a flexible region (the hinge) to a constant Fc region. This structure comprises two pairs of polypeptide chains, each pair containing a heavy and a light chain of different sizes.

Antibodies displaying an agonist or antagonist activity (functional grade antibodies) are powerful tools for mimicking or blocking physiological functions *in vitro* and *in vivo*. Functional grade antibodies are available free of preservatives and tested for low endotoxin content and may be used for activation, neutralizing or blocking studies, both *in vitro* or *in vivo*.

Blocking/Neutralizing

Activation/Induction

Depletion

anti-CD3e (human), mAb (UCHT1)

ANC-144-020		100 µg
ANC-144-820	Preservative free	100 µg
ANC-144-030	Biotin	100 µg
ANC-144-040	FITC	120 tests
ANC-144-050	R-PE	120 tests
ANC-144-060	APC	120 tests
ANC-144-520	F(ab') ₂	100 µg
ANC-144-580	Fab	100 µg

CLONE: UCHT1. **ISOTYPE:** Mouse IgG1. **SPECIES:** Human. **APPLICATION:** FACS, FUNC, WB.

Functional Application: This antibody clone activates T cells expressing CD3e.

anti-CD16 (human), mAb (3G8)

ANC-165-020		100 µg
ANC-165-820	Preservative free	100 µg
ANC-165-030	Biotin	100 µg
ANC-165-040	FITC	120 tests
ANC-165-520	F(ab') ₂	100 µg
ANC-165-530	Fab (Biotin)	100 µg
ANC-165-580	Fab	100 µg

CLONE: 3G8. **ISOTYPE:** Mouse IgG1. **SPECIES:** Human. **APPLICATION:** FACS, FUNC.

Functional Application: This antibody clone blocks binding of complexed IgG to CD16 and has been used to block ADCC *in vitro*.

anti-CD28 (human), mAb (ANC28.1/5D10)

ANC-177-020		100 µg
ANC-177-820	Preservative free	100 µg
ANC-177-030	Biotin	100 µg
ANC-177-040	FITC	120 tests
ANC-177-050	R-PE	120 tests
ANC-177-520	F(ab') ₂	100 µg

CLONE: ANC28.1/5D10. **ISOTYPE:** Mouse IgG1κ. **SPECIES:** Human. **APPLICATION:** ELISA, FACS, FUNC.

Functional Application: This antibody clone stimulates expression of IL-2 from CD28⁺ cell and can induce antigen-independent T cell proliferation.

anti-CD32 (human), mAb (7.3)

ANC-181-020		100 µg
ANC-181-820	Preservative free	100 µg
ANC-181-030	Biotin	100 µg
ANC-181-050	R-PE	120 tests
ANC-181-520	F(ab') ₂	100 µg
ANC-181-580	Fab	100 µg

CLONE: 7.3. **ISOTYPE:** Mouse IgG1κ. **SPECIES:** Human. **APPLICATION:** FACS, FUNC.

Functional Application: This antibody clone reacts with a domain 2 epitope of all CD32 isoforms and blocks immune complex binding.

anti-CD64 (human), mAb (10.1)

ANC-216-020		100 µg
ANC-216-820	Preservative free	100 µg
ANC-216-030	Biotin	100 µg
ANC-216-040	FITC	120 tests
ANC-216-050	R-PE	120 tests
ANC-216-520	F(ab') ₂	100 µg
ANC-216-530	Fab (Biotin)	100 µg
ANC-216-580	Fab	100 µg

CLONE: 10.1. **ISOTYPE:** Mouse IgG1. **SPECIES:** Human, Dog, Monkey. **APPLICATION:** FACS, FUNC, WB.

Functional Application: This antibody clone blocks binding of Fc gamma RI to immunoglobulin-opsonized cells and inhibits fibrocyte differentiation.

anti-CD252 [OX40L] (human), mAb (ANC10G1)

ANC-400-020		100 µg
ANC-400-820	Preservative free	100 µg
ANC-400-030	Biotin	100 µg
ANC-400-040	FITC	120 tests
ANC-400-050	R-PE	120 tests
ANC-400-060	APC	120 tests

CLONE: ANC10G1. **ISOTYPE:** Mouse IgG1κ. **SPECIES:** Human. **APPLICATION:** ELISA, FACS, FUNC.

Functional Application: This antibody clone blocks binding of recombinant CD134 to CD134L on HUVEC.

STANDARD Exosomes Markers Tetraspanin Antigens CD9, CD63 and CD81

Exosomes are extracellular vesicles generated by all cells and they carry nucleic acids, proteins, lipids, and metabolites. They are mediators of near and long-distance intercellular communication in health and disease and affect various aspects of cell biology. Intercellular communication through exosomes seems to be involved in the pathogenesis of various disorders, including cancer, neurodegeneration and inflammatory diseases.

Sensitive and specific antibodies are an essential tool for the **detection of extracellular vesicles (EVs)**, including exosomes, which express antigens with 3D conformations and/or post-translational modifications that often differ from the cellular counterpart.

The group of tetraspanin proteins **CD9, CD63, and CD81** are the **most common EV-associated markers** reported in the literature and have been used for **EV capture** in many studies, including **ELISA, flow cytometry, and lab-on-a-chip assays**. Each of these tetraspanins has been demonstrated to play an active role in EV biogenesis or cargo sorting, suggesting their essential role in the EV secretory pathway.

Ancell Corporation offers specific and sensitive antibodies for tetraspanin detection and exosome capture and a plethora of additional antigen specific antibodies which consequently allows to phenotype EV populations based on the antigen profile.

FIGURE: Exosome Biomarkers CD9, CD63, CD81.

Specific and Sensitive Tetraspanin Antibodies

anti-CD9 (human), mAb (SN4)

ANC-156-020		100 µg
ANC-156-820	Preservative free	100 µg
ANC-156-030	Biotin	100 µg
ANC-156-040	FITC	120 tests
ANC-156-050	R-PE	120 tests

CLONE: SN4. **ISOTYPE:** Mouse IgG1κ. **SPECIES:** Human. **APPLICATION:** FACS, WB.

This antibody clone specifically reacts with the large extracellular domain (LED) of the tetraspanin CD9 molecule.

anti-CD63 (human), mAb (AHN16.1)

ANC-215-020		100 µg
ANC-215-820	Preservative free	100 µg
ANC-215-030	Biotin	100 µg
ANC-215-040	FITC	120 tests
ANC-215-050	R-PE	120 tests

CLONE: AHN16.1. **ISOTYPE:** Mouse IgG1. **SPECIES:** Human. **APPLICATION:** FACS, FUNC, ICC.

This antibody clone specifically reacts with the tetraspanin CD63 molecule.

anti-CD81 (human), mAb (1.3.3.22)

ANC-302-020		100 µg
ANC-302-820	Preservative free	100 µg
ANC-302-030	Biotin	100 µg
ANC-302-040	FITC	120 tests
ANC-302-050	R-PE	120 tests

CLONE: 1.3.3.22. **ISOTYPE:** Mouse IgG1. **SPECIES:** Human. **APPLICATION:** FACS, ICC, WB.

This antibody clone specifically reacts with the tetraspanin CD81 molecule.
