

Product no **YH-80004**

Anti-6xHis Tag Rabbit Polyclonal Antibody

Product information

| | |
|--------------------|---|
| Background | The 6x histidine recombinant protein tag is made up of 6 histidine residues attached to either the amino or carboxy terminus of the protein being expressed. The recombinant protein can then be purified using immobilized metal ions, traditionally nickel, in a procedure termed immobilized-metal affinity chromatography. Further analysis of the protein can be achieved using an antibody specific to the 6x histidine in techniques such as western blotting and immunoprecipitation. |
| Origin | Rabbit polyclonal antibody raised against a 6x histidine peptide conjugated to OVA. |
| Application | Western Blotting: 1:1,000 ~ 1:10,000 ELISA: 2,000 ~ 20,000 dilution IP: 500 ~ 1,000 dilution |
| Form | Liquid (containing 50% glycerol) |
| Storage | Store this product at -20°C. The product is stable for one year from the date of shipment. |
| Package | 100ug/per tube Con. 1mg/mL |

N : N-terminal 6xHis Tag fusion Protein
C : C-terminal 6xHis Tag fusion Protein
Antibody dilution : 5,000 x
